EAGLE®

FIBER LASER CUTTING SYSTEMS

NOTHING FASTER

TECHNICAL DATA

Cutting speed:	**max. 150m/min**
Positioning:	**180 m/min**
Acceleration:	**3G**
Laser Sources:	**from 1 to 30kW**

eVision

#haveVision

STANDARD EQUIPMENT

- Fiber laser source
- Linear motors on all axes
- Advanced composite material body structure
- Rigid steel traverse
- eVa cuting head
- Ultra-fast pallet changer without hydraulics

MACHINE MODEL	[um]	1530	2040	2060	2560	2580	3080	25120	25160	30120	30160

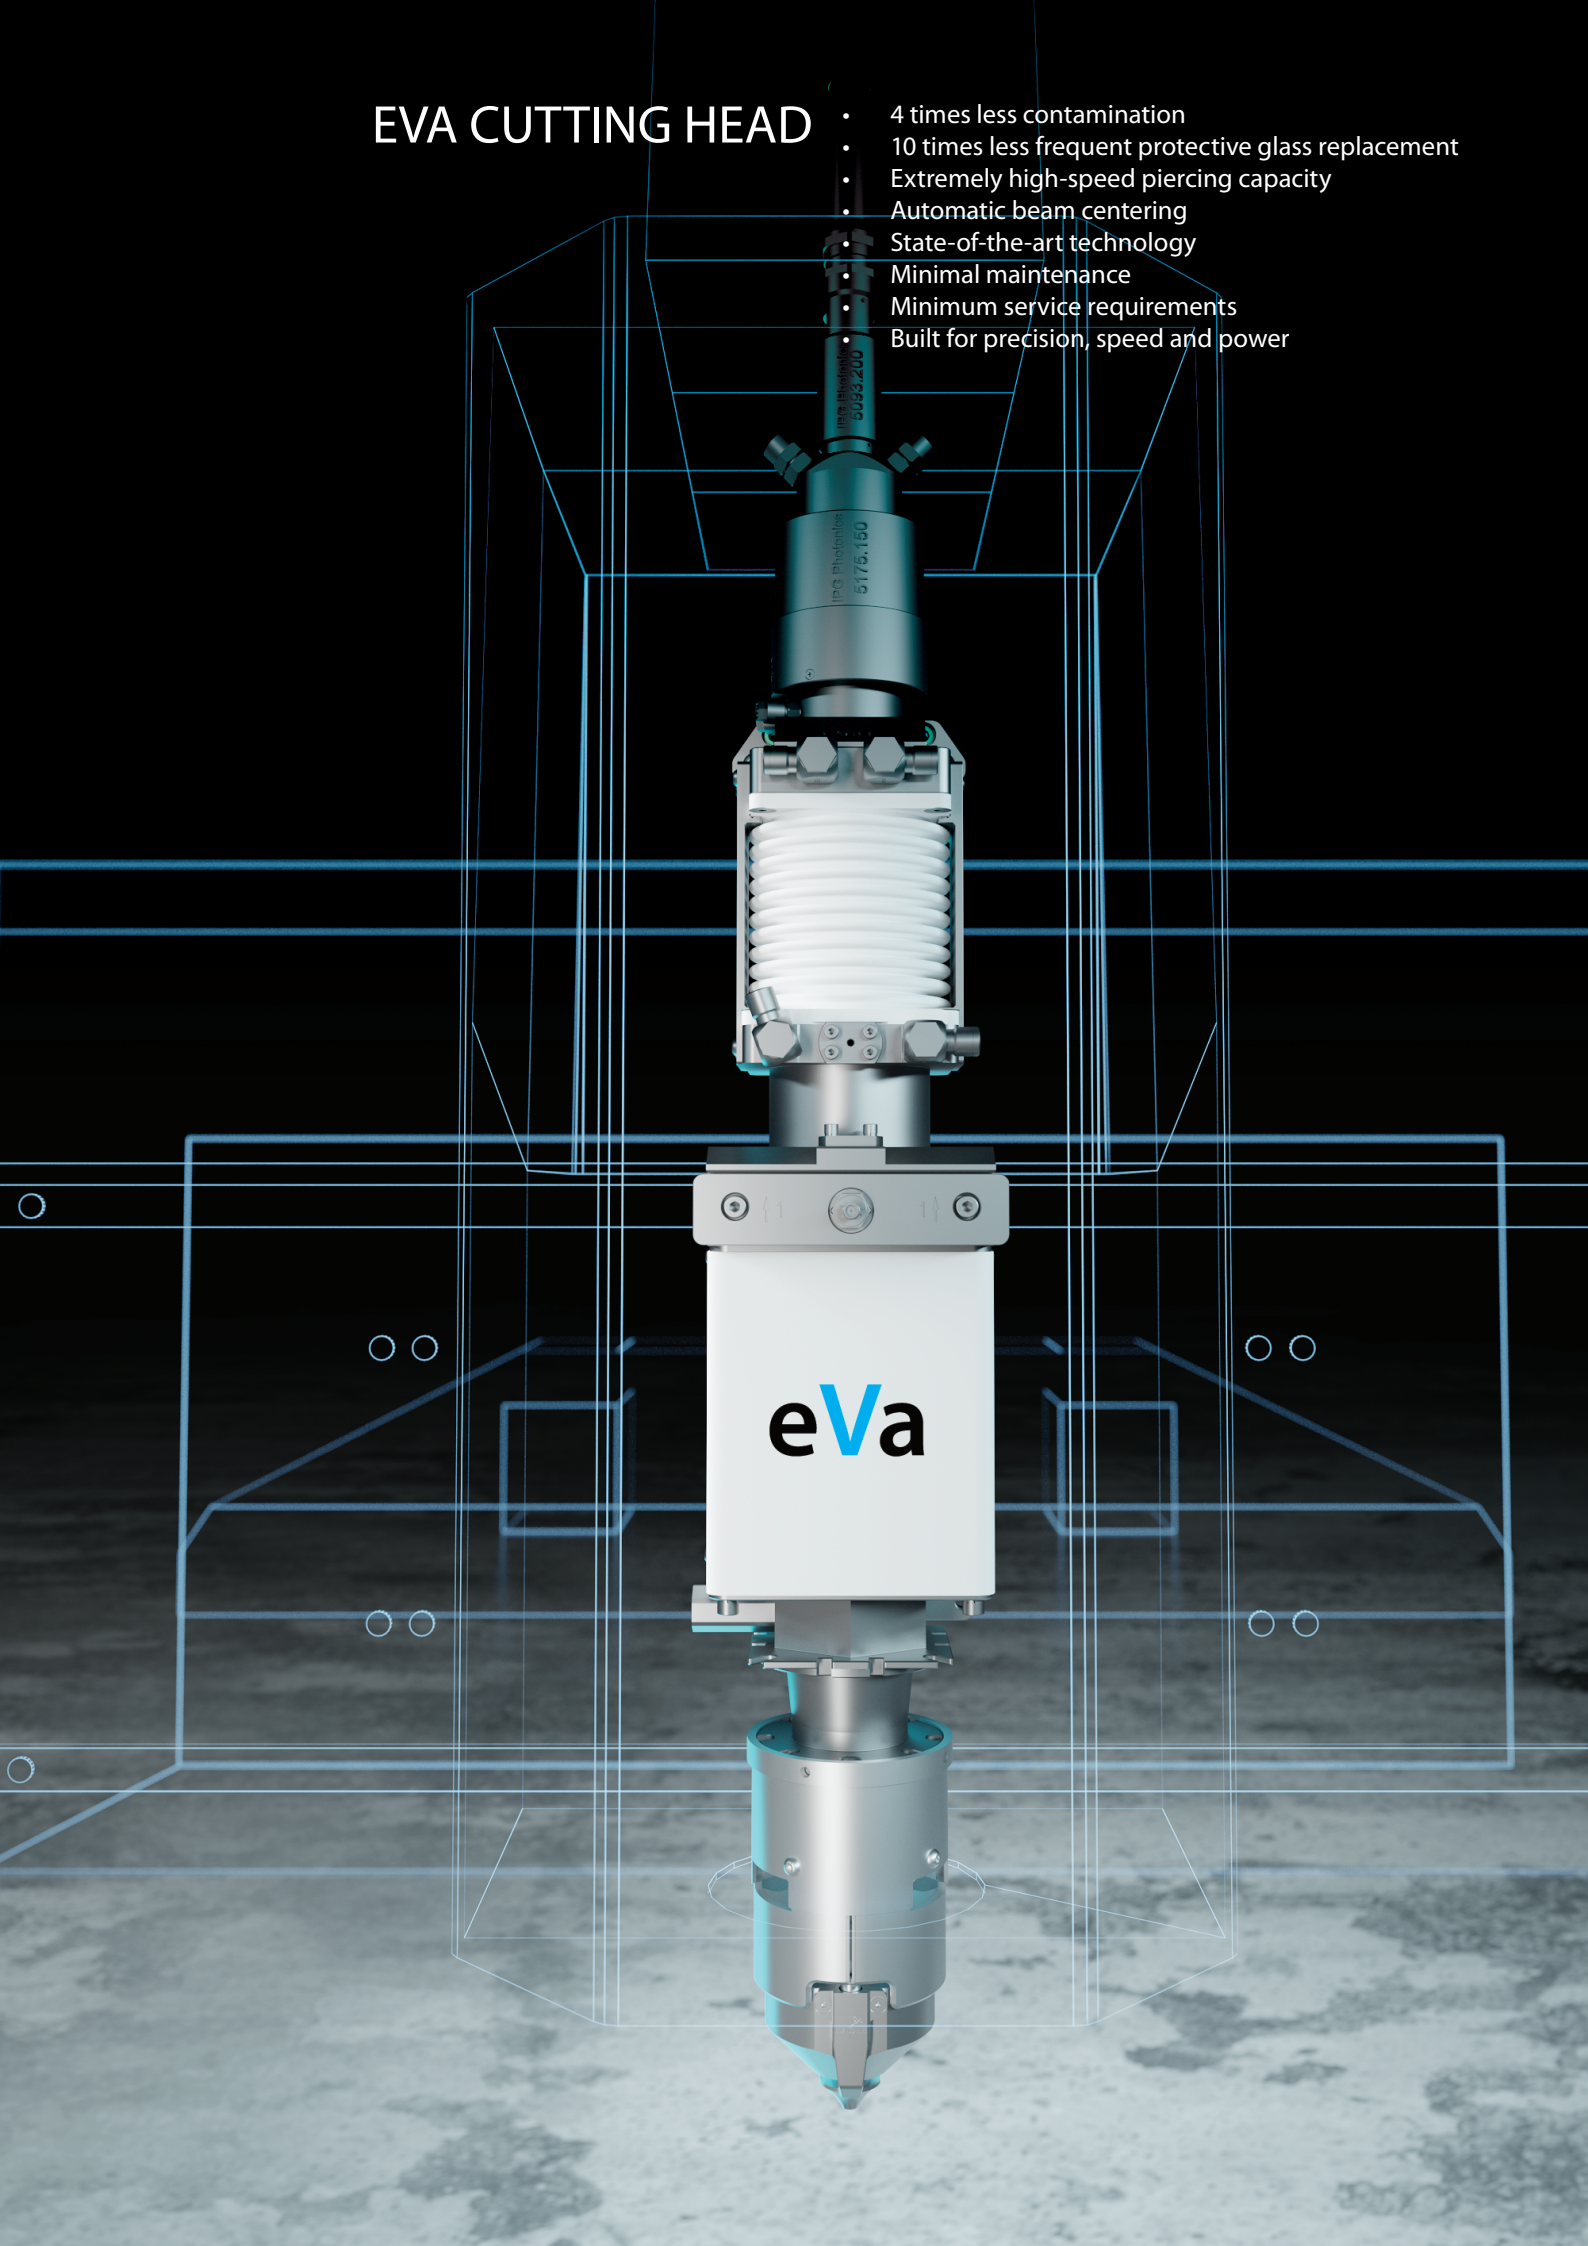
EVA CUTTING HEAD

- 4 times less contamination
- 10 times less frequent protective glass replacement
- Extremely high-speed piercing capacity
- Automatic beam centering
- State-of-the-art technology
- Minimal maintenance
- Minimum service requirements
- Built for precision, speed and power



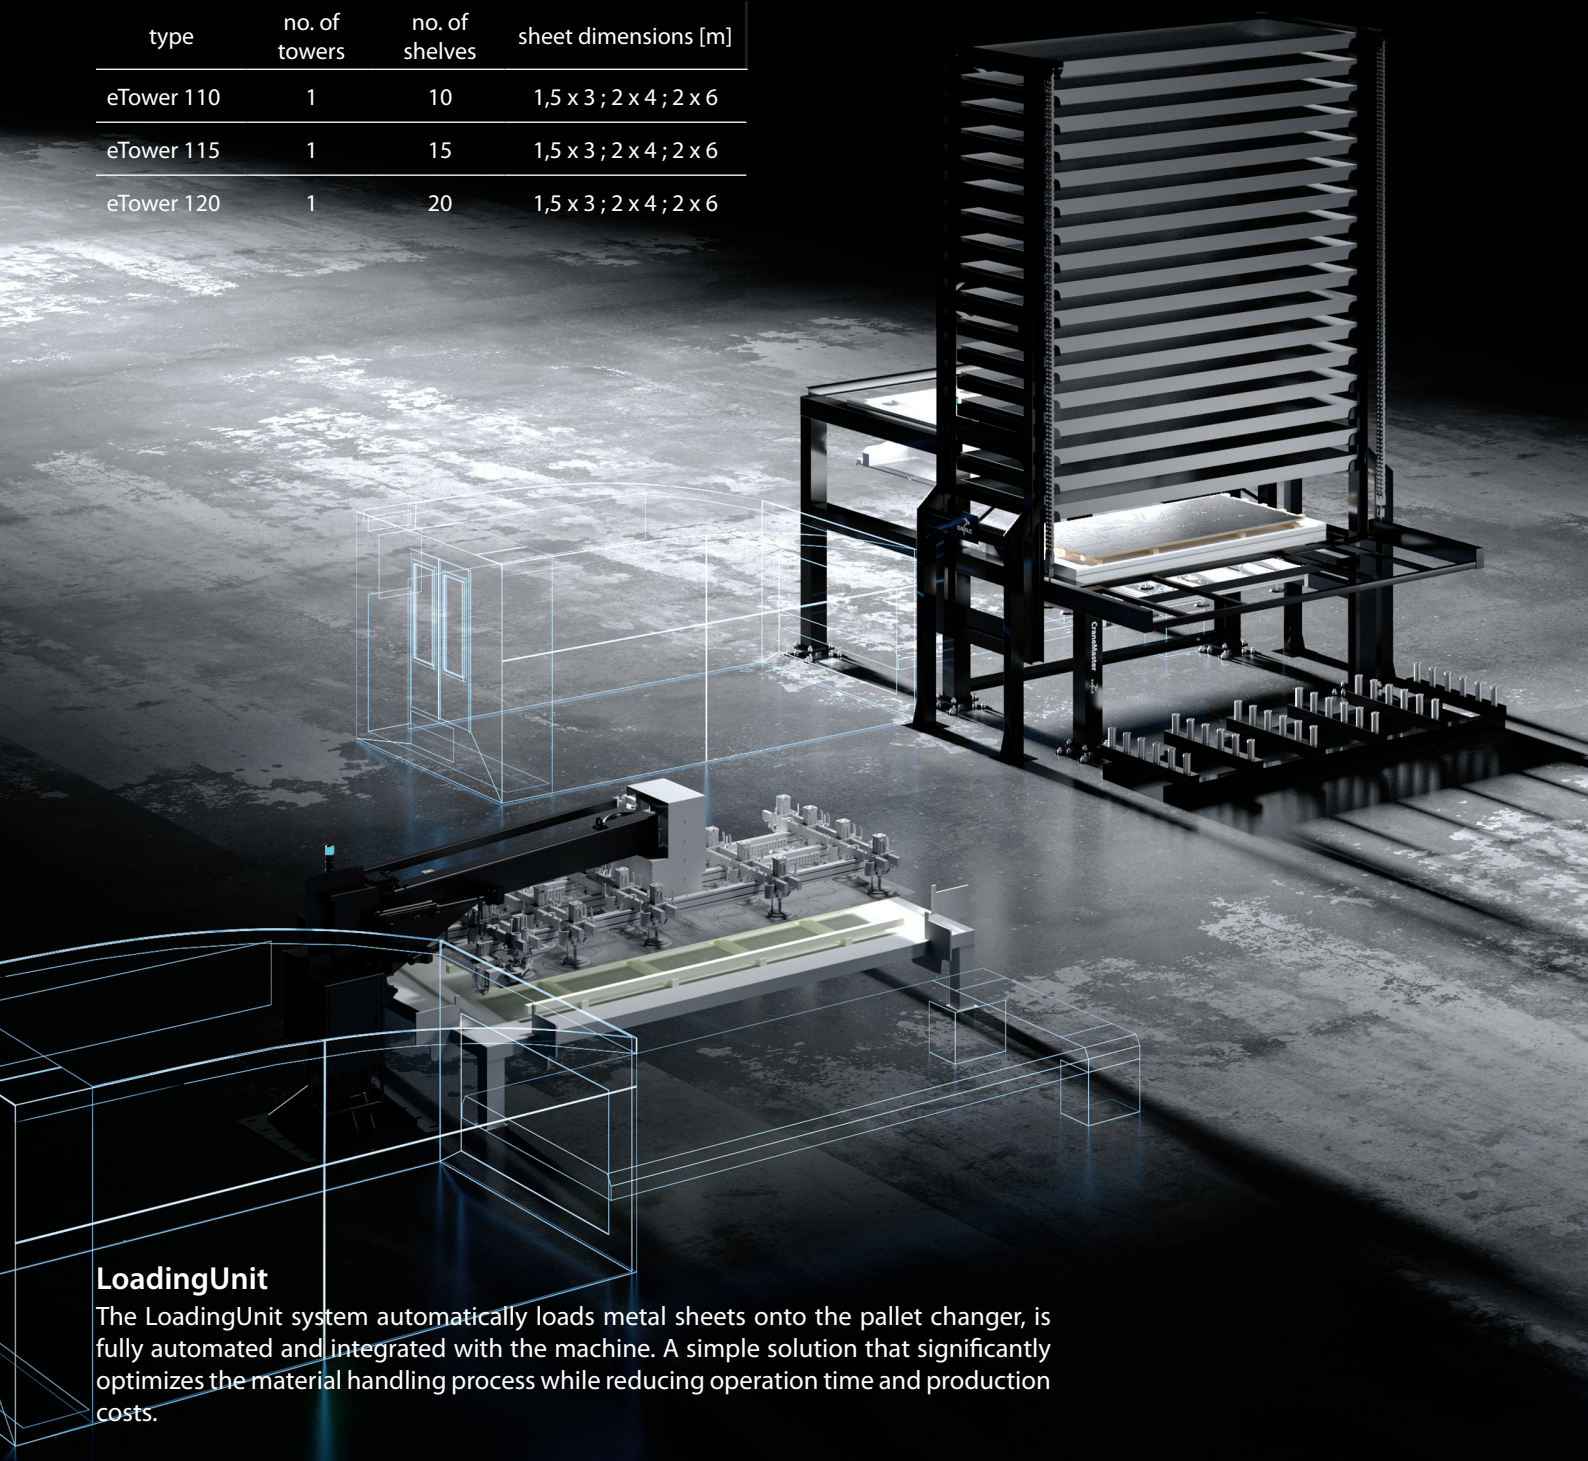
Automation

eTower 1

A single storage tower equipped with a loading/unloading station and universal shelves that can be used for raw material as well as for cut parts and remnants. Thanks to its compact construction, it optimizes storage space and stock management.

TECHNICAL DATA

type	no. of towers	no. of shelves	sheet dimensions [m]
eTower 110	1	10	1,5 x 3 ; 2 x 4 ; 2 x 6
eTower 115	1	15	1,5 x 3 ; 2 x 4 ; 2 x 6
eTower 120	1	20	1,5 x 3 ; 2 x 4 ; 2 x 6



LoadingUnit

The LoadingUnit system automatically loads metal sheets onto the pallet changer, is fully automated and integrated with the machine. A simple solution that significantly optimizes the material handling process while reducing operation time and production costs.

TECHNICAL DATA

cycle time	55s
max. sheet size	1,5m x 3m; 2m x 4m
max. sheet	25mm

eTower 2

The eTower 2 is a two-tower warehouse system which can be equipped with a different number of shelves according to the customer's requirements. It optimises storage process logistics and material preparation, and guarantees high storage density.

TECHNICAL DATA

type	no. of towers	no. of shelves	sheet dimensions [m]
eTower 226	2	26	1,5 x 3 ; 2 x 4 ; 2 x 6
eTower 236	2	36	1,5 x 3 ; 2 x 4 ; 2 x 6
eTower 246	2	46	1,5 x 3 ; 2 x 4 ; 2 x 6

CraneMaster

The CraneMaster system was designed for loading/unloading material and cut parts. Thanks to its highly efficient cycle time and the capacity to simultaneously load and unload material, it secures a constant supply and contributes to the cost-effectiveness of the production process.

TECHNICAL DATA

cycle time	65s
max. sheet size	1,5m x 3m; 2m x 4m; 2m x 6m
max. sheet	25mm
