DUCT SEAMING MACHINES

DuctZipper L-Form

The DuctZipper in L-shape is specifically designed for large ducts. On the DuctZipper-L the working position is rotated by 45 degrees. The horizontal flange of the duct rests on the table while the vertical flange is directed straight up. Gripping grooves in the vertical wall let the operator easily hold and guide the duct while passing it through the machine.

Easily accessible forming rolls for cleaning and maintenance.

Working speed doubled through quicker loading of following part.

Even very large ducts can be produced with only two operators.

Improved seaming accuracy also results in a reduced distortion of the duct cross-section.

For large ducts and high productivity
