SWING BEAM SHEARS

# SMARTcut

RAS has added a TouchScreen control to the SMARTcut swing beam shear, thus giving optimum clearness on the monitor. With its 3100 x 2 mm and 2540 x 2.5 mm the RAS SMARTcut models combines all characteristics of a high performance, premium shear.

The pop-up hold-down (right) prevents thin and very sensitive sheets from being lifted and bent during the upstroke of the swing beam.

Convenient blank alignment with the LED cutting line illumination.

Parts chute for cut piece delivery to the front.

The foot lever switches the parts chute direction.

With a rotation wheel, the cutting gap eccentric can be quickly and easily adjusted to sheet thickness and material type

CUTTING LENGTH MAX.	2540 mm	3100 mm
SHEET THICKNESS MAX.	2.5 mm	2.0 mm
