THE WILSON TOOL DIFFERENCE

COMPANY OVERVIEW

From very humble beginnings in a small manufacturing facility in St. Paul, Minnesota, Wilson Tool has added manufacturing facilities and sales channels around the world to better serve our thousands of global customers. Throughout our International expansion, our mission has never wavered - we continue to offer products and services that help you be more successful. Every product you buy, every employee with whom you communicate, and every training event you attend, are designed to help customers just like you be more successful.

The products included in this catalog represent the results of over 50 years of helping customers resolve their most challenging fabrication issues. And don't be concerned if the challenge you are currently facing can't be resolved with a product included in this catalog. Give us a call and let us put our many decades of expertise to the test. We will work with you to find the best possible solution to whatever challenge you may be facing.

From all of us at Wilson Tool, we thank you for the trust you have placed in us to provide products and services that are critical to your success. We look forward to your continued success as we move forward.

Sincerely,

Brian Robinson
Wilson Enterprises

The Wilson Tool Punching Division continues to drive the industry with new levels of quality, delivery service and innovation.

From the early days of Series 80 tooling to Wilson Wheels to innovative EXP technology, our punching division has been the leading innovation driver in the industry. When combined with the most experienced customer support professionals in the industry, the solutions offered from Wilson Tool continue to raise the bar on performance and innovation. Thick turret, Trumpf, Salvagnini, or any other style of punch press you may be using, Wilson Tool offers the most complete line of tooling solutions available today.

PUNCHING

BENDING

Wilson Tool's Bending Division delivers the most complete line of tooling and clamping solutions available anywhere.

Whether you use European, Wila/Trumpf style precision tooling or conventional style tooling, Wilson Tool has a solution for you.

Our clamping options cover these styles as well. With hydraulic push button options, quick release mechanical options, or standard manual clamps, Wilson Tool has a clamping solution for any style of machine or budget. And our custom tooling manufacturing capabilities have quickly become the envy of the industry with innovative solutions for very complex bending challenges.

Wilson Tool's Stamping division (aka Impax Tooling Solutions) offers high quality punch and die components for the stamping industry.

Innovative products such as our Accu-Lock retainer inserts, and extensive coating options combined with our world-class customer service have enabled us to quickly grow into a world-class provider.

Our custom tooling expertise is second to none with many customers coming to us for their most difficult stamping challenges.

STAMPING

ACCESSORIES

Whether you need tool sharpening grinders, tooling storage systems, or other types of related supplies, our accessory products offer a wide range of solutions to help you be more productive.

From small to large items, our accessories will help your shop be more organized and efficient.

WILSON TOOL OFFERS UNIQUE COATINGS TO INCREASE THE LIFE OF YOUR PUNCHES

Wear-Beater™

Wilson Tool's exclusive Wear-Beater coating is a titanium nitride (TiN) coating that helps reduce galling and extends punch life in certain applications.

Optima®

Optima coating provides significantly longer tool life, more hits between sharpenings, reduced galling, better performance and less downtime. With a surface hardness of 95 Rockwell C, Optima far exceeds the hardness levels that can be achieved with conventional tool steels. It resists galling in stainless and galvanized steel and is unaffected by sharpening. Optima coating will outlast untreated tools by as much as 5-7 times.

Slip-Max™

Available only from Wilson Tool, our Slip-Max coating has proven effective in some very tough punching and forming applications. The combination of its hardness and lubricity greatly increases punch life and reduces galling when piercing aluminum. Slip-Max is also very effective in resolving even the most challenging stripping problems with punching or forming stainless steel and aluminum.

COATING RECOMMENDATION BY APPLICATION	WEAR-BEATER	OPTIMA	SLIP-MAX

ULTIMA® PREMIUM TOOL STEEL IMPROVES DURABILITY AND PERFORMANCE

Available exclusively from Wilson Tool, this advanced steel is engineered to increase wear resistance by up to an astounding 100% over conventional tool steels.

A New Level of Performance

Ultima® punches and dies set a new benchmark for durability and performance, dramatically improving tool life when punching materials that are abrasive or have a high tensile strength. Ultima excels in applications where ordinary punches wear quickly and it is ideal for long-run jobs. It significantly reduces micro chipping, where cutting edge failure most often begins.

Remarkable Downtime Reductions

With up to twice as long between regrinds, Ultima punches and dies substantially reduce downtime and tool replacement costs. Breaking, chipping, cracking, tool fatigue and other problems are minimized, providing long-term gains in productivity and profitability.

Ultima premium steel punches and dies are especially useful for the toughest applications, but are effective for any job.

EXP punches shown

PARTING TOOLS

Parting and slitting are common practices

in sheet metal fabrication. Whether you are parting nested parts or straightening the edge of the sheet, you need a product that is rigid and delivers a long tool life.

Wilson Tool developed the Dura-Blade™ and Dura-Die parting products specifically to maximize your productivity for these applications.

Dura-Blade™ features a simple push button adjustment and replaceable cutting blade insert made from Ultima® premium tool steel to significantly increase grind life. The punch blades are supplied with rooftop shear as a standard to reduce punching force and noise.

The **Dura-Die parting tool** completes Wilson Tool's ultimate parting solution. If a new die is necessary, simply replace the removable insert and you are quickly back up and running. When combined with our Dura-Blade product, you are able to greatly increase the life of your parting tools and to help minimize material waste, both products are available with a one or two-sided relieved strippers for use in close-to-clamp. Dura-Dies are also made from Ultima® premium tool steel to significantly increase grind life.

THE TOOLS FOR YOUR SUCCESS

Whilst this catalogue certainly contains many of the physical tools you may need to be successful, Wilson Tool also offers a variety of educational opportunities that are designed to help drive your success.

We encourage you to take advantage of the many free resources offered by some of our leading technical experts covering a wide variety of topics.

These educational opportunities include:

SOLUTION-FOCUSED NEWSLETTERS

These are designed to not just be a monthly sales pitch, but practical solutions to common and not-so-common fabrication issues.

TRADE SHOWS

Wilson Tool attends many trade shows across Europe and the Middle East on an annual basis. Come visit us at your local show and challenge our sales team with your enquiries. A list of our upcoming shows are available on our website.

OPEN DAYS

Not only are our customers always welcome to visit our facilities but we also host Seminar Days to help our customers find the best solutions to their manufacturing problems. From Press Brake to Punch Press to Lean manufacturing, we host a variety of events so our customers get the most out of their day.

For more information about any or all of these educational opportunities, ask your local Sales Engineer or visit wilsontool.com

MULTI-TOOLS

Multi-Tools enable you to load the equivalent of 3, 8, or even 20 smaller tools in a single station. This increases your turret capacity and reduces set-up times and costs. Wilson Multi-Tools are engineered with the strongest available tool steel.

MTX 'R' Series

Easier than ever tool-less adjustments and changes, with no additional tooling inventory needed. HP and EXP thick turret punches, strippers and dies, can maximize grind life and lower tooling costs.

- Punch at any angle from 0° - 360°
- 3 station and 8 station options
- Adjust punch length with a simple twist of the punch driver
- Visual guide groove makes setting tool length simple
- Punches are held in the 'up' position when not in use, leaving material mark-free
- Internal lube port keeps all parts moving smoothly
- Optional coatings provide exceptional wear resistance

MT7A

This consolidates up to seven punches into a single tool, reducing multiple set-ups. The drop-in style allows punches to be loaded or unloaded quickly and easily, and accepts all styles of 'A' station punch, guide assemblies and dies.

SPECIALS

Incorporating forming applications into your fabrication can add value to your processes while reducing cost by boosting efficiencies and eliminating secondary operations.

No matter how unique your requirement, Wilson Tool works with you to design and manufacture punch press tooling that meet the needs of your most demanding application. Our highly skilled engineers and toolmakers combine unmatched experience with specialized manufacturing systems to produce products that meet the challenges of your most demanding applications.

Wilson forming tools are manufactured with high grade materials to maximize tool life and machine up time. They are engineered with features like positive stopping to ensure you consistently get a form to your specifications on every hit. And when working with challenging material Wilson offers solutions like coatings to improve stripping and reduce sheet marking. Each special tool is tested using our in-house punch presses, and a sample is included with every forming special tool we ship. Wilson special tools are manufactured to our superior quality standards and tolerances and with the shortest lead times available.

YOU NEED BETTER SOLUTIONS, FASTER!

Wilson approaches every special tooling request with a “never say no” attitude. And with the fastest lead times in the industry, your special tooling will arrive when you need it.

Estimated pre-punch formula:
 $B - [(B - C) \times .75] = \text{Pre-punch}$

AVAILABLE IN FOLLOWING STATIONS: **A B C D E**

APPLICATION	ADVANTAGES	INFORMATION NEEDED
Coining tools are used for forming countersinks and counter bores for screws or to deburr the edge of a hole.	<ul style="list-style-type: none">• Coining on the punch press eliminates costs and time when compared to a secondary operation of machining countersinks.• Interchangeable inserts for form down countersinks allow you to easily change coin sizes and reduce tooling costs.• Form up coin dies are self-stripping.• Multiple coating options available to aid in stripping	<ul style="list-style-type: none">• Machine model• Material thickness and type• Angle, coin diameter (B), thru-hole size with or without pilot (C).• Screw size and type• Form-up or form-down

X-SHARP GRINDER

Sharpening your punch press tooling is simpler and faster with the unique and innovative X-Sharp grinder from Wilson Tool.

The benefits:

- Burr-free, quality parts straight off the punch press
- Longer tool life for reduced tooling costs
- No scrapped or wasted sheets due to tooling malfunction
- Reduced wear on your punch press
- Available in the colours of your choice to match your machines

Punch Press Compatible

ULTRASONIC CLEANER

Material build-up, or "Galling", will have a detrimental impact both on the life of your tooling and on the quality of the parts produced on your punch press.

To protect the investment you have made in punch press and press brake tooling, Wilson Tool can now offer a range of high quality and innovative Ultrasonic cleaners that will remove galling in minutes without damaging the tool surface.
